

AIR-Breeze Install Guide

This document describes how to install the AIR-Breeze extension for Google Chrome. For Firefox simply download it from <https://addons.mozilla.org/en-US/firefox/addon/air-breeze/>

The install guide:

1. Download “AIR-Breeze.zip” and unzip it to a folder of your choosing.
2. In Chrome, go to <chrome://extensions/>
3. There, enable “Developer mode” in the top-right corner.
4. Click on “LOAD UNPACKED” in the top-middle of the screen.

5. Navigate to the folder where you unzipped “AIR-Breeze.zip” and select the unzipped folder. If it fails check if there isn’t another folder in the unzipped folder.
6. If all went well you should now see AIR’s flag in the extension area. Click it to learn how to use the extension. When you start chrome it may say “Disable developer mode extensions”. Click “Cancel” if it does.

The obvious question: Why can’t I download it from the Chrome Web Store? The answer is because I need to pay \$5 to be able to upload extensions there. That’s not the problem, the problem is Google only accepting credit cards, something I don’t have nor can get. If you would be willing to pay it for me, contact me. I’ll pay you back using regular bank transaction or paypal.
